3.	New Books	51
	<u>Annual Report 2003, Danish Fur Breeders' Research Center</u>	51
	Cortisol and corticoid metabolites in mink faeces. <i>J. Malmkvist, R. Palme, S.W. Hansen, B.M. Damgaard</i>	51
	Behaviour and production parameters as an indication of welfare in female breeding mink during different social housing conditions from weaning to pelting time. <i>V. Pedersen</i>	51
	Fibres in mink feed in the winter period. Influence on behaviour and reproduction. <i>S.W. Hansen, T.N. Clausen, J. Malmkvist, B.M. Damgaard, C. Hejlesen</i>	52
	Project welfare in practice. <i>L.L. Jeppesen, T. Simonsen, V. Pedersen</i>	52
	Mink selected to produce on a low protein content in the feed. Status for lactation period 2002, growing period 2002 and lactation period 2003. <i>T. Clausen, C. Hejlesen, P. Sandbøl</i>	53
	Fibre as a satiety factor in mink feed. <i>C. Hejlesen, P. Sandbøl</i>	53
	Growth and development of mink as function of different plant or fish oils included in feed used during the gestation and nursing period. <i>C. Bjerregaard, T.N. Clausen, T.M. Lassen, K. Mortensen, H. Sørensen, J.C. Sørensen, S. Sørensen</i>	53

Fatty acid profiles of mink milk and tissues of kits as a function of different n-6:n-3 fatty acids ratios in the diet. <i>T.N. Clausen, M.U. Hansen, T.M. Lassén, K. Mortensen, H. Sørensen, J.C. Sørensen, A.H. Tauson</i>	54
Protein content in feed for mink females and kits. <i>T. Clausen, C. Hejlesen, P. Sandbøl</i>	54
Blood meal to mink kits in the growing – furring period. <i>T. Clausen, C. Hejlesen</i>	55
Poultry offal to mink in the growth period combined with meat and bone meal and swine pulp in the furring period. <i>T. Clausen, C. Hejlesen</i>	55
Amino acid profiles in the growing and the furring period of mink (<i>Mustela vison</i>). <i>P. Sandbøl, T.N. Clausen, C. Hejlesen</i>	55
Methionin and other methyl donors to mink in the furring period. <i>T. Clausen, P. Sandbøl, C. Hejlesen</i>	56
Digestibility of different sources of starch. <i>C. Hejlesen, P. Sandbøl</i>	56
Reduced protein and amino acid profiles in the growing/furring period of mink (<i>Mustela vison</i>). Influence on health, growth and fur quality. <i>P. Sandbøl, T.N. Clausen, C. Hejlesen</i>	57
Amino acid imbalance in mink feed in the growing period – Influence on the liver. <i>P. Sandbøl, T.N. Clausen, C. Hejlesen, J.B. Andersen, B.M. Damgaard</i>	57
Investigation in organ size in big mink. <i>T. Clausen</i>	58
Conversion factors for estimation of amino acid digestibility from the digestibility of crude protein. <i>C. Hejlesen</i>	58
Development of analytical methods for characterisation of starch. <i>C. Bjerregaard, C. Christiansen, K. Mortensen, H. Sørensen</i>	58
Detection and sequence analysis of Danish and Swedish strains of mink astrovirus. <i>C. Mittelholzer, L. Englund, K.-O. Hedlund, H.-H. Dietz, U. Hellman, G. Czifra, L. Svensson</i>	59
